# ROHRER'S PRICE LIST

## Can You Afford to Pass Up this Profit?

Sometimes it is wise to spend to save. That's true in growing wheat. An investment in ROHRER'S LANCASTER COUNTY GROWN SEED WHEAT assures a reduced growing cost—and a bigger margin of profit between what it costs you to grow and what you get.

You, as a farmer, are interested in only one thing—the profit it will make for you. ROHRER'S LANCASTER COUNTY GROWN SEED WHEAT helps you make more profit in two ways—it improves the quality of your wheat, and increases your yield per acre.

# Lancaster County Grown Seed Wheat

**Leap's Prolific.** *Beardless.* Ripen early. Straw—long, stiff. One of the most popular varieties grown. Immense stooler and deep rooter. Does not shell out easily. A safe wheat to sow. Sow 1½ bushels per acre.

**Forward.** *Beardless.* Straw long, stands up well. Chaff—white. Yields good and very hardy. You take no chances in sowing Forward. Buy ROHRER'S RE-CLEANED WHEAT AND GROW MORE BUSHELS PER ACRE. Sow 1½ bushels per acre.

**Penna. 44.** *Bearded.* Straw—stiff and long. Makes more straw than any other wheat. Heavy yielder and fine for milling. Sow 1¾ bushels per acre.

**Thorne.** *Beardless.* A New Variety developed by Cornell College. Stiff straw and a good yielder. Sow 1¼ bushels per acre.

**Winter Barley.** *Treated*—Farmers today are turning to Barley as a means of cutting down dairy feed costs. With a few acres of Barley you can cut feed costs to a surprising low figure. Sow 2 bushels per acre.

**Winter Oats.** Lee Cold Proof. Last year we offered Winter Oats, for the first time. Customers reported yields of 60 to 69 bushels per acre. Yields more straw than barley. Sow 2 bushels per acre.

**Timothy.** Our Fancy Timothy is 99.70% pure. Practically free from weeds. Prices are low this year. Order your Timothy along with your Wheat.

**Alfalfa.** Good Northwest Alfalfa is very short for Fall seeding. Our stock is grown in Utah, testing 99.50% pure and is U. S. Verified seed.
